

AAC for the iPad & iPod

Support communication using contextual scenes on your iPad, create hotspots and use symbols to play recorded messages and videos from hotspots. Features Widgit symbols, scheduling and sharing options. A flexible and fun tool for AAC and language development.

Features a sophisticated word prediction engine designed to increase efficiency and ease of communication using direct typing or writing, switch access or by turning the whole screen into a switch. You can customise the keyboard and voices to suit you and send emails, SMS, facebook and Twitter.

Proloquo2Go™ is product from AssistiveWare that provides a full-featured communication solution for people who have difficulty speaking. It brings natural sounding text-to-speech voices, close to 8000 up-to-date symbols, powerful automatic conjugations, a large default vocabulary, full expandability and extreme ease of use to the iPhone, iPod touch and iPad

Proloquo2Go

Minimal Pair Pack

Minimal Pair Pack is a useful application for working on speech sound discrimination and production. Designed for children with developmental communication difficulties and also adults with phonological difficulties. Easy to use flash card style tasks can be set up quickly by therapists or teachers for use with a range of clients.
